Forecast for Monday 21 Aug 2023

Weather: Rather cloudy this morning, but sunny spells are likely this afternoon and early this evening, particularly in the east. Largely dry during the daytime, but the odd drizzly shower is possible in the west this morning, and some light rain is likely this evening as cloud amounts increase again.

Chance of cloud-free hill tops above 600m: 40% becoming 95%.

Low cloud and visibility: Fairly extensive cloud above 400-500m at first, lifting clear of most summits by early afternoon, although cloud may persist on the highest tops. Very poor visibility in low cloud covering hills, but otherwise generally good or very good, with far-reaching views through the afternoon and early evening.

Freezing Level*	2500m	2400m	2400m	2500m	2600m	2500m	2500m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Good navigation skills will be required in any low cloud covering hills. High UV levels later mean sun protection is recommended.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Tuesday 22 Aug 2023

Weather: Rather cloudy in the west of the national park, but sunny spells are likely to develop further east. The odd drizzly shower is likely in the west during the morning but it will be largely dry.

Maximum wind: Southwesterly 20-25 mph gusting 30-35 mph.

Chance of cloud-free hill tops 600m: 40% becoming 70%.

Low cloud and visibility: Fairly extensive cloud above 400-500m at first, lifting generally to around 600m, and tending to break up in the east of the park. Very poor visibility in cloud covering hills, and poor in drizzle in the west, but generally good visibility in the east.

Temperature: **Valleys:** Plus 12 Celsius rising to plus 19 Celsius.
At 600m: Plus 13 Celsius rising to plus 16 Celsius.
Freezing level: Well above the summits.
